JOHN HARLEY DE LEON

Gyöngyös, Hungary | +36 30 61 3 81 67 | johnharleydeleon@gmail.com

PROFESSIONAL SUMMARY

Industrial Engineer with more than 10 years of hands-on manufacturing experience across methods engineering, production leadership, industrial performance, quality, and digital transformation. Proven ability to work directly with shop-floor teams, analyze manufacturing processes and data, and deliver practical improvements in productivity, quality, throughput, capacity, and standard work. Brings strong project management, stakeholder collaboration, and problem-solving capabilities suited to engineered-to-order manufacturing operations.

CORE EXPERTISE

- **Industrial Engineering:** Methods engineering, capacity analysis, line balancing, time studies, ergonomics, standard work.
- **Data & Analytics:** Advanced Excel, Tableau, SQL, KPI development, performance dashboards, cost-benefit analysis.
- **Lean & Six Sigma:** Lean diagnostics, VSM, Kaizen, waste reduction, Schneider Performance System, Green Belt problem solving.
- **Project Delivery:** Cross-functional leadership, prioritization, stakeholder engagement, training and change adoption.
- **Production Improvement:** Throughput, productivity, quality, yield, manpower, material flow, process optimization.
- **Manufacturing Systems:** FMEA, NPI support, line design, tools and jigs, digital work solutions, AutoCAD.

PROFESSIONAL EXPERIENCE

Site Cybersecurity & Digital Leader

March 2026 – Present

Schneider Electric | Gyöngyös, Hungary

- Driving the site's digital transformation and Smart Factory roadmap by translating production priorities into actionable initiatives that elevate operational visibility, standardization, and overall performance.
- Partnering across production, engineering, maintenance, IT, and central teams to successfully execute minimum mandatory requirements (MMRs) and implement Smart Transformation Stories.
- Mobilizing key users and tool champions to deliver hands-on shop-floor training, significantly strengthening the adoption of digital tools and standard work practices.
- Evaluating and integrating new IT/OT and manufacturing technologies, including infrastructure upgrades and application deployments, backed by thorough investment feasibility studies.
- Safeguarding the site's digital landscape and OT asset inventory via VESTA and Claroty to maintain accurate data, ensure regulatory compliance, and guarantee resilient manufacturing operations.
- Resolving critical operational technology incidents and vulnerabilities in tight coordination with local stakeholders and central support to prevent production downtime.
- Deploying Best-of-Breed tools and directing the local rollout of SAP S/4HANA as the Business Process Owner (BPO) for production execution, IT tools, and connectivity.

Smart Factory Engineer & Cybersecurity Leader

Nov 2023 – March 2026

Schneider Electric | Gyöngyös, Hungary

- Executed the Smart Factory site transformation by translating global directives into tangible local solutions aligned with Smart Factory Standard requirements.
- Engineered Tableau dashboards and performance views that converted raw manufacturing data into actionable insights, driving production efficiency and informed operational decisions.
- Championed the Lean Digitization System (LDS) and Digitized Idea and SIM System (DISS) as the primary key user, resolving frontline issues, maintaining data accuracy, and driving adoption to meet Minimum Mandatory Requirements (MMR).
- Maintained strict cybersecurity compliance across the shop floor by actively monitoring, analyzing, and mitigating

General

Deployment & Transformation Leader
Jan 2022 – Nov 2023

Schneider Electric | Cavite, Philippines

- Directed the global deployment and seamless upgrade of Smart Factory Solutions, ensuring strict adherence to Service Level Agreements (SLAs) and delivering comprehensive user support.
- Designed and distributed global training materials while actively monitoring user adoption rates, identifying specific opportunities to accelerate the integration of new technologies.
- Optimized solution utilization and drove continuous service improvements, which directly increased operational efficiency and elevated customer satisfaction levels across the organization.
- Implemented strategic IT and operational enhancements that significantly improved the overall quality and speed of internal service delivery.

NPM / PCBA Production Manager (Section Manager)
Jan 2021 – Dec 2021

Sercomm Philippines Inc. | Laguna, Philippines

- Directed Printed Circuit Board Assembly (PCBA) operations, consistently hitting and exceeding daily targets for production, quality, materials, and scheduling.
- Slashed material attrition rates on the production line by implementing tighter shift-level consumption controls and fostering a dynamic 5S animation culture.
- Overhauled work-order allocations and production schedules in partnership with planning teams, establishing section KPIs and rigorous review routines to guarantee on-time completion.
- Elevated organizational productivity and quality standards by conducting thorough employee performance evaluations, recognizing top talent, and driving continuous improvement initiatives.

Industrial Performance Leader
Oct 2019 – Dec 2020

Schneider Electric | Cavite, Philippines

- Executed Schneider Performance System (SPS) assessments to diagnose capability gaps, delivering targeted recommendations to build and sustain required competencies.
- Rolled out green/red SPS principles across SIM, MPH, line architecture, and design, which notably improved operating discipline and operational efficiency.
- Bridged gaps between Cavite plants and other SE sites by facilitating cross-functional initiatives that integrated best practices and achieved critical industrial performance targets.
- Adapted and deployed standardization packages from the EAJP SC Performance team to establish robust and scalable process frameworks.
- Led high-impact Six Sigma/Lean, Continuous Improvement, and Kaizen Blitz projects from inception to completion, partnering with documentation specialists to validate cost savings and ROI.
- Cultivated a Lean Six Sigma culture site-wide by training personnel, upgrading training materials, publishing case studies, and boosting engagement through structured Idea Management.

Methods Engineer
Jun 2017 – Sep 2019

Schneider Electric | Cavite, Philippines

- Spearheaded Lean diagnostic projects that generated approximately EUR 260,000 in annual savings through aggressive waste reduction, process redesign, and efficiency gains.
- Partnered with industrialization and cross-functional teams to drive seamless new product introductions (NPI) and facilitate supplier improvement workshops.
- Engineered and optimized production lines utilizing LADM/SPS principles, supported by rigorous capacity and manpower analyses to maximize resource utilization.
- Created detailed work instructions and designed custom tools and jigs that enhanced manufacturing process quality, repeatability, and operator ergonomics.

- Exercised tight control over manufacturing workflows by performing FMEA, methods-time measurement (MTM), line balancing, time-and-motion studies, and value-stream mapping (VSM).
- Boosted daily operational efficiency by configuring and integrating Oracle, Manufacturing Execution Systems (MES), and standard digital performance packages.
- Guided junior engineers and managed external contractors to ensure project alignment with broader engineering and production goals.

Quality Engineer
Mar 2017 – Jun 2017

Schneider Electric | Cavite, Philippines

- Executed rapid containment, root-cause analysis, and corrective actions for nonconformities to guarantee that all products met rigorous customer specifications.
- Integrated Lean Six Sigma methodologies into daily quality operations, successfully reducing waste and strengthening overall process controls.
- Built robust quality systems and authored comprehensive inspection plans derived directly from complex design specifications.
- Ensured sustained compliance by participating in high-stakes customer quality audits and executing routine shop-floor 5S and quality inspections.

Continuous Improvement Leader / Production Supervisor
Nov 2014 – Mar 2017

Schneider Electric | PEZA Rosario, Cavite, Philippines

- Managed daily production-line execution across manpower, machines, materials, methods, and measurement (5 M's) to consistently hit safety, quality, delivery, and productivity KPIs.
- Delivered high-value cross-functional process improvements by leveraging operational data, Lean practices, and shop-floor idea management.
- Directed comprehensive team operations, including cross-training, performance appraisals, attendance tracking, and conflict resolution, to build a highly motivated and skilled workforce.
- Controlled the production line's daily cadence, monitoring yields and efficiency closely while collaborating with support groups to quickly eliminate production bottlenecks.
- Championed management programs and secured necessary production improvement materials and equipment through strategic purchase requisitions.

EDUCATION

Bachelor of Science in Industrial Engineering
De La Salle, Lipa City, Philippines

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Certified Project Management Specialist
- Certified Lean Six Sigma Yellow Belt
- RPA Business Analyst Fundamentals
- School of Data Science
- Methods-Time Measurement
- Advanced Lean
- Ergonomics
- Certified Lean Six Sigma Green Belt
- Claroty Cybersecurity Analyst
- Cybersecurity Fundamentals
- Excel Master Class
- Tableau
- Lean Fundamentals
- AutoCAD
